

This exploded perspective view shows the assembly of the medical device. At the top is a cylindrical tube (10) with a rounded tip. Below it is a circular ring (11) with a central hole. A small, curved, hook-like component (12) is positioned below the ring. Below the ring is a large, U-shaped component (1) with two vertical legs. At the bottom are two circular discs: the top one (3) has radial segments (31, 32) and a central hub; the bottom one (2) is a solid ring with an inner hole (21) and an outer rim (22). A vertical dashed line indicates the central axis of the device.
